

BARTONIA PANICULATA (Michx.) Robinson, var. INTERMEDIA Fernald. "First between Nova Scotia and the Blue Hills, Mass." [RHODORA, xxiii. 287 (1921).] Only one small plant found, in the same swamp in which *Ilex glabra* grows. This Bartonia has been discussed in RHODORA under the name *B. iodandra*.—NATHANIEL T. KIDDER, Milton, Massachusetts.

---

A STATION IN MAINE FOR ILEX VERTICILLATA, FORMA CHRYSOCARPA. —Late in November of last year a young friend from Belgrade was coming to visit my school in Smithfield. Although only thirteen years of age this lad, Orel P. Stevens, has a very good knowledge of the flora and fauna of this vicinity and is a very close observer of nature. While still in Belgrade but not far from the line which separates the two towns, and the counties of Kennebec and Somerset, his keen eye, trained to detect anything unusual, discovered a shrub which looked "new." Upon investigation he decided it was of more than ordinary interest and brought some of the berry-laden branches to my school. I was interested at once and upon consulting the Manual decided it was the yellow-berried variety of the Black Alder, *Ilex verticillata*, forma *chrysocarpa*, Robinson, reported only from Georgetown, Massachusetts. A few days later I obtained some of the berries from the same shrub and sent specimens to the Gray Herbarium where the identification was verified. It is a pleasure to be able thus to report it from Maine.—HARRIET A. NYE, Fairfield Center, Maine.
